accountability check

AFC Growth Fund supports strong, commonsense accountability provisions for all private school choice programs. Transparency and accountability is smart public policy, and also provides educational choice advocates with readily available data and information to showcase program successes.

Academic Accountability results

in transparency to parents, policy makers, taxpayers and donors. Parents must have the information to choose high-quality schools that meet the needs of their children, while policy makers, taxpayers and donors must measure the impact of private school choice programs on academic achievement and attainment.

ACCOUNTABILITY STANDARDS IN VOUCHER PROGRAMS

Administrative Accountability

requires schools to meet health and safety codes, comply with nondiscrimination requirements and conduct background checks on employees. In scholarship tax credit programs, Scholarship Granting Organizations (SGOs) disclose donations and scholarship details, as well as conduct background checks of SGO operators.

Financial Accountability requires schools to file annual financial reports and demonstrate financial viability. In scholarship tax credit programs, financial accountability requires SGOs

to demonstrate sound financial standing.
